

# The Potential Market for CDM Projects

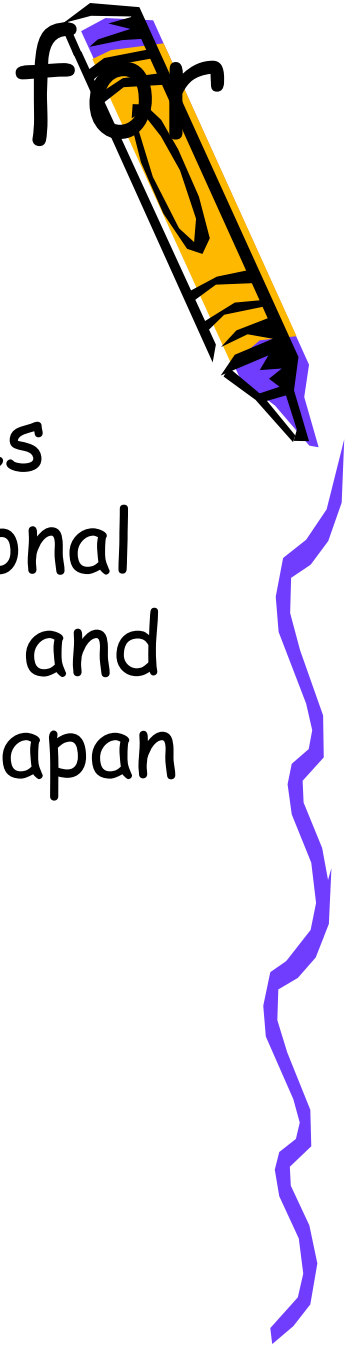

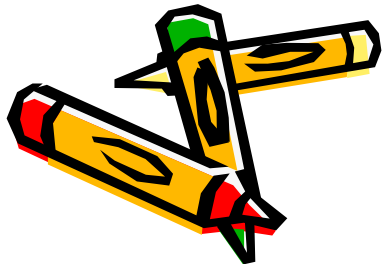

By: Mohammad Reza Salamat  
Interregional Advisor on Energy  
For Sustainable Development  
United Nations/DESA, New York

Final Seminar on "KP" project  
Tehran/ 28 July 2002

# The Potential Market for CDM Projects

A number of initiatives/programmes developed thus far by international organizations (such as WB/PCF) and national governments (such as Japan and the Netherlands) and the private companies

# The Potential Market for CDM Projects

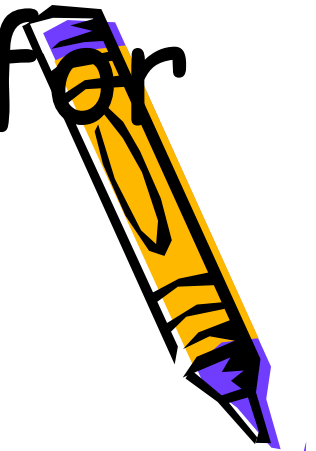

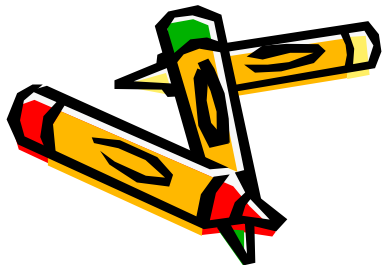

- A total of 75 CDM projects have been developed so far, expecting the generation of 131 Million CERs
- The 75 CDM projects are spread over 26 countries
- Two countries (Brazil and India) will host 27 projects (out of 75 projects total), claiming 73 Million CERs (out of 131 Million total CERs, i.e. more than half)

# The Potential Market for CDM Projects

Breakdown of CDM project proposals:

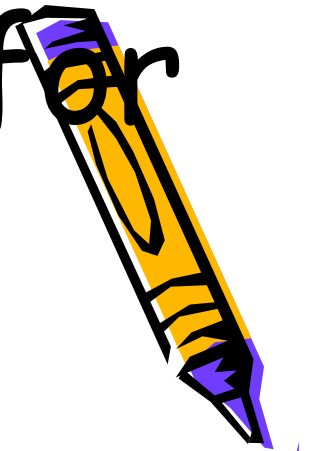

- 34 projects on "Renewable energies"
- 20 projects on "capturing non CO2 gases" (%23)
- 13 projects on "Energy Efficiency" (%15)
- 10 projects on "large Hydro" (%11)

# The Potential Market for CDM Projects

Breakdown (Cont.):

- 6 projects on Fuel Switching (%7)
- 2 projects on "Sinks" (%2)
- 1 project on "waste incineration" (%1)

# The Potential Market for CDM Projects

The vast majority of projects are based on "Renewable Energy sources"

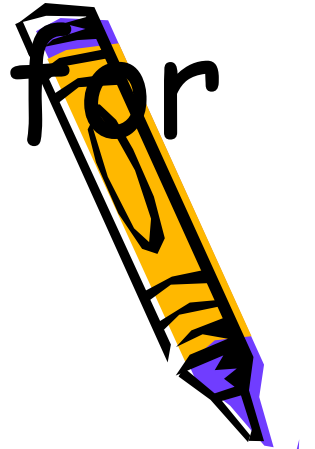

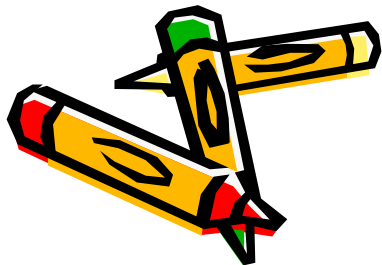

- 19 projects on "Biomass" (the most common projects)
- 9 projects on "Wind"
- 5 projects on "Small Hydro"
- 1 project on "Geothermal"

# The Potential Market for CDM Projects

PCF has 5 Project Idea Notes (PIN) for Renewables, which include:

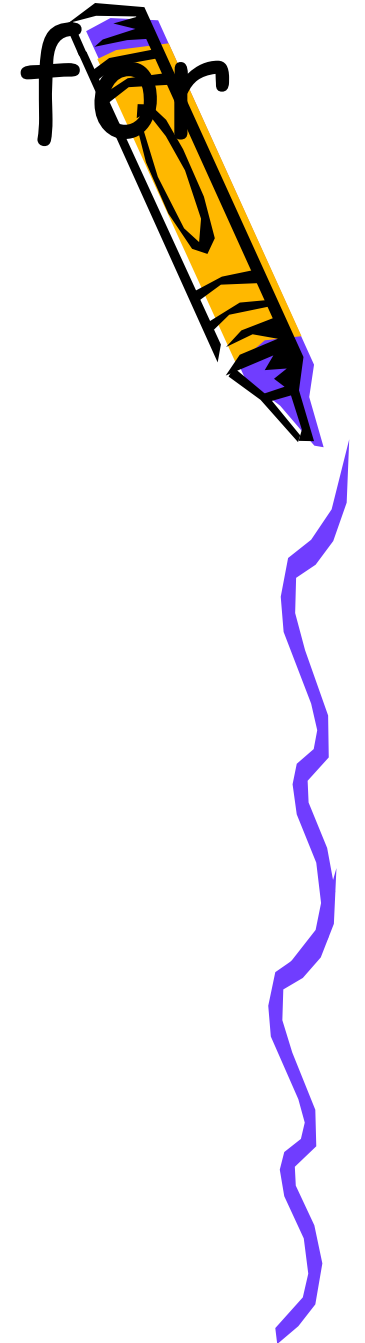

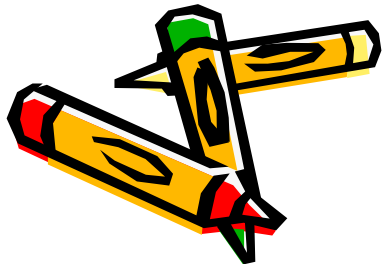

- 3 Wind projects
- 1 Geothermal project
- 1 Biomass project

# The Potential Market for CDM Projects

The Finish CDM programme has 5 Renewable projects under development, which includes:

- 4 Mini-Hydro
- 1 Biogas project

# The Potential Market for CDM Projects

Breakdown of CERs to be generated:

- 13 Million CERs come from Renewables (%10)
- 9.5 Million CERs come from Large Hydro (%7)
